

JUAN GOMEZ

Frontend Developer | Full Stack Web

[Linkedin](#) • [+57 3225374589](#) • jsga008@gmail.com

Dynamic Web Developer with over 2 years of experience in frontend development, skilled in collaborating with agile and multicultural teams across Latin America, India, Vietnam, and Romania. Expertise in creating scalable, responsive, and user-friendly interfaces using React, Redux, and MUI, as well as leveraging AI tools and agent-based workflows to improve development efficiency and product quality. Recognized for adaptability, meticulous attention to detail, and a strong collaborative mindset, consistently delivering clean, tested, and maintainable code aligned with product objectives. Passionate about using technology and artificial intelligence to enhance user experience and drive project success.

EDUCATION

- **Software Analysis and Development, Technologist - 2022 a 2024:** SENA, Colombia

The program focuses on the design, development, evaluation, and quality control of software solutions, following technical procedures and industry standards. Training includes:

- Designing software solutions aligned with technical requirements and established procedures.
 - Developing applications based on design specifications and modern development methodologies.
 - Ensuring software quality through technical standards and service evaluation practices.
 - Analyzing and evaluating requirements using recognized analysis methodologies and industry frameworks.
-

EXPERIENCE

Globant • Remote

Web UI Developer: August 2024 – November 2025

- Collaborated with international teams in an Agile SCRUM environment, contributing to daily standups, sprint planning, and demos.
- Developed responsive and pixel-perfect UI components using React.js, MUI, and Figma design specifications.
- Applied controller/UI architecture to create reusable components, ensuring scalability and maintainability.
- Integrated RESTful APIs, maintaining clean and modular code following ESLint rules and SonarQube standards.
- Ensured high test coverage using Jest and Testing Library, contributing to product stability and code reliability.
- Demonstrated attention to detail by implementing consistent design systems and resolving complex UI bugs.
- Led UI development for a ChatGPT wrapper project, including Landing Page, Dashboard, and Settings modules.
- Delivered an internal tech talk titled “Code that Lasts: SOLID Principles and AI Tips” (October 2025), focused on writing maintainable and high-quality code using SOLID principles, clean code practices, and AI-assisted development.
- Tools/Technologies: React, TypeScript, MUI, API Integration, GitLab, CSS, Jest, Testing Library, SonarQube, ESLint.

College Trainee, Web UI Developer: November 2023 – July 2024

- Developed a full-featured contact manager (“React Contact List”) using React, Redux, SCSS, and Jest; strengthened understanding of reusable component design and unit testing.
- Participated in “Glober-Market”, a trainee-led internal tool for process optimization, contributing from research and wireframing to final UI implementation.
- Designed and deployed the Dashboard Project using AppScript and Looker Studio, centralizing data from multiple spreadsheets.
- Worked within Agile SCRUM practices and showed resilience and accountability when adapting to shifting priorities and technical challenges.
- Tools/Technologies: React, Redux, SCSS, JavaScript, HTML5, CSS3, Jest, AppScript, Git, GitHub, MUI, Agile, Clean Code.

Semillero SENNOVA · Hybrid

Web Developer, Monitor: August 2023 – November 2023

- Contributed to the design and implementation of a research-based educational platform using React and Bootstrap.
- Developed interactive features and UI components with attention to accessibility and usability.
- Supported UI improvements using React Router and custom icon sets with React Icons.
- Recorded audio content for educational activities, enhancing platform interactivity.
- Contributed to solving UI/UX challenges with adaptability and clear communication, collaborating with diverse academic teams.
- Tools/Technologies: React, React Router, Reactstrap, React Icons, Bootstrap.

SKILLS

- **Languages & Markup:** JavaScript, TypeScript, HTML5, CSS3, SCSS, PHP, SASS, SQL
- **Frameworks & Libraries:** React, Redux, Styled Components, MUI, Bootstrap, Reactstrap, React Router, Express, Node.js, Tailwind, Laravel
- **Testing & Quality:** Jest, Testing Library, ESLint, SonarQube, Unit Testing, Clean Code
- **Architecture & Patterns:** MVC, SPA, Component Reusability, API Integration, REST APIs, Axios
- **Tools & Platforms:** Git, GitHub, GitLab, AppScript, Figma, AI tools, Docker
- **Development Practices:** Responsive Design, Agile Methodologies, SCRUM, SOLID
- **Soft Skills:** Problem Solving, Teamwork & Collaboration, Clear Communication, Resilience, Adaptability, Self-learning, Proactiveness, Attention to detail

LANGUAGES

- **Spanish:** Native
- **English:** Upper Intermediate (B2 - CEFR)
